Professional Experience

SGMRT_BOT

July 2017 - Ongoing

Developer

- Built a Telegram Chatbot to avoid taking train during disruption
- The bot will notify user if there is a breakdown/disruption going on as well as train arrival timings
- Scouted by Vulcan Post for email interview
- Growing user base ~5000 as of Aug 2017
- Link : https://t.me/sgmrt_bot

Singapore Checkpoint Android App and Website

Feb 2015 - Ongoing

Developer

- Built an Android App and Website to tell user going to Malaysia the traffic condition
- ~22,000 downloads and ~5000 monthly active users
- Link to App : <https://goo.gl/o4iRda>
- Link to Website : <http://www.sgcheckpoint.com>

Ante Prints

May 2017

WordPress Developer

- Redesigned Ante Prints website per customer requirement
- Customer was satisfied with the redesign
- Link: www.anteprints.com

Shifttime Technologies

Mar 2015 – May 2015

Junior Android Developer

- Designed and developed the Shifttime Employer Mobile Application prototype, based on PHP/Laravel framework, and was also responsible for both UI and UX, which was crucial in the early stages of manual onboarding users
- Maintained the database of both new users and employers who were on boarded and ensured that the process of on boarding and interaction between the two parties were seamless during the Alpha testing phase
- Attended several App-testing interviews with employers and future App users to analyse user feedback and requirements for the building of future features and concept creation
